

Urfan Karimli

Front end Developer

I have strong knowledge of **HTML, CSS, JavaScript, React, and Tailwind CSS**, and I have experience in building **responsive and user-friendly** web applications. I am proficient in **version control using Git** and effective **team collaboration on GitHub**. I excel at converting **design mockups** into functional, high-quality code and optimizing web performance. I am passionate about keeping up with the **latest web technologies** and trends to deliver **innovative solutions**.

PERSONAL PROJECTS

Data Park [🔗](#)

- Contributed to the development of DataPark, an innovative platform for data enthusiasts and professionals. DataPark provides comprehensive resources on data science, including job vacancies, IT news, industry updates, and blog posts. It also features information on upcoming events and conferences, making it a valuable resource for those looking to advance their careers and stay informed about the latest trends in the data field.

Tap.az (copy) [🔗](#)

- The main objective of this project is to gain practical experience with React.js technologies and become familiar with modern frontend tools. Since no backend is used in this project, static data is stored in JavaScript files to ensure proper functionality in the Vercel environment
